Credit Unions to See Check Imaging and Payment Settlement "Come Of Age" Through New WesCorp/Bluepoint Partnership

WesCorp and Bluepoint Solutions team up to deliver new efficiencies as envisioned by Check 21.

San Dimas, Calif. – Credit unions can now leap forward in gaining a cost-effective and efficient way to comprehensively capture check images at their branches and send those images electronically, completing the entire settlement process as envisioned by Check 21. The new advantage for credit unions comes with today's announcement by WesCorp and Bluepoint Solutions that they have signed an agreement leading to a real value-added option for credit unions. The partnership will see Bluepoint Solutions serving as WesCorp's exclusive preferred provider by powering "IMAGEin™," WesCorp's premier comprehensive solution for the check imaging and payment settlement process.

Tony Kitt, WesCorp's Senior Vice President of Payment Systems, explained, "Credit unions want a reliable, and cost-effective way to manage the demands associated with today's payment settlement process. Partnering with Bluepoint Solutions will help us meet those needs by providing a driving energy towards a new era in which checks are scanned and saved as digitized files using IMAGEin. This ability, along with the efficiencies associated with WesCorp's economies-of-scale in payment processing, mean real added value to credit unions."

"Our goal has always been to empower the paperless credit union, and Check 21 opens up a whole new frontier," says Bluepoint Solutions CEO Hal Tilbury. "Our document management expertise, combined with the unmatched resources of WesCorp, assures credit unions of a top-notch, turnkey solution."

IMAGEin is WesCorp's premier solutions for check processing and settlement. The turnkey solution incorporates all aspects of check handling in the new Check 21 environment, from scanning and truncating the paper check, saving it as a digitized image, sending and archiving the data and images, and collecting the funds and settlement. WesCorp plans to rollout IMAGEin in July after all current testing has been successfully completed.

"Today's partnership between Bluepoint Solutions and WesCorp is a major step in bringing IMAGEin to credit unions looking for that one, totally integrated solution," added Kitt.
