

Major Inefficiencies of not going paperless.

Inefficiency: Teller Cash Management

The issue

Teller operations carry an inherent risk of robbery. Too much cash on-hand and potential loss is increased. With too little cash on-hand, member service is impaired.

Ask yourself these questions:

- How frequently do operations personnel count cash in the vault?
- Are certain tellers chronically over their cash limits?

What is the solution?

QwikBlance allows operations management to monitor actual cash denominations on selected tellers as needed throughout the day. Risks can be managed without disrupting service.
