## Summit CU Up and Running With Enterprise-Wide Document Management From Bluepoint

Vista, Calif. -- Bluepoint Solutions, the premier provider of document management solutions for credit unions, today announced that Summit Credit Union is now live with the company's award-winning document management system. Based in Greensboro, NC, Summit CU has \$90 million in assets and more than 20,000 members.

"We started out just looking for a COLD archiving system, but quickly realized that COLD is just the tip of the iceberg when it comes to document management," says Summit CEO Sam Whitehurst. "Bluepoint allowed us to look beyond a simple COLD solution and move towards becoming a true paperless credit union." Whitehurst claims that the Bluepoint offering was much more robust than any of the others he looked at. "The member-centric focus of the Bluepoint system was also a key factor," he adds.

"There's no question that Summit Credit Union is all about serving its members," says Bluepoint Solutions CEO Hal Tilbury. "It's this kind of commitment that keeps the credit union movement going strong, and we're very proud to help Summit further that effort through effective document management."

Although the system just went live, Whitehurst already has an eye on the future. Says Whitehurst, "We look forward to realizing the benefits of Check 21 and feel Bluepoint can get us there faster than any other third-party vendor." A key benefit here is that Bluepoint can integrate Check 21-compliant image capture with the company's Receipt Manager™ product.

"We are glad to have Bluepoint as our newest partner in serving the needs of Summit Credit Union, our staff and members," concludes Whitehurst.
